If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

### DETAILED ACTION

The examiner acknowledges the applicant's submission of an amendment dated 2/9/2010. The previously rejected claims 42 and 46 are cancelled.

### *Conclusion*

A. Subject Matter Considered Allowable

**Claims 1-3, 6-12, 15, 18, 20, 24-26, 30-36, 40, 41, 47 and 48** are allowable.

The primary reasons for allowance of **claim 1** in the instant application is the combination with the inclusion in these claims that **"means for receiving downstream data from a second memory module over the communication bus...means for assembling the downstream data and the local data into the data block"**. The prior art of record neither anticipates nor renders obvious the above recited combination.

The primary reasons for allowance of **claims 7 and 31** in the instant application is the combination with the inclusion in these claims that **"means for receiving the downstream data from a second hub...means for assembling the downstream data and the local data into the data block"**. The prior art of record neither anticipates nor renders obvious the above recited combination.

The primary reasons for allowance of **claim 15** in the instant application is the combination with the inclusion in these claims that **"means for generating a second access request to send the downstream data over the communication bus; means for sending the data within the data block over the communication bus during a data block transmission period;"** and **"allocating one or more first**

**contiguous lanes within a first section of a data block to at least some of the local data...positioning a header between the first section and the second section".**

The prior art of record neither anticipates nor renders obvious the above recited combination.

The primary reasons for allowance of **claim 18** in the instant application is the combination with the inclusion in these claims that **"the means for receiving...means for receiving local data from one or more local memory storage units"**. The prior art of record neither anticipates nor renders obvious the above recited combination.

The primary reasons for allowance of **claim 24** in the instant application is the combination with the inclusion in these claims that **"wherein the data block structure includes a fixed number of lanes...arranging a remainder portion of the first source data within a first section of the data block structure during a second processing period, wherein the first section includes a first set of contiguous bits"**. The prior art of record neither anticipates nor renders obvious the above recited combination.

The primary reasons for allowance of **claim 36** in the instant application is the combination with the inclusion in these claims that **"the data block structure including a fixed number of lanes...determining that second source of data from a second source is available to be sent over the communication bus, wherein the second source data includes a second header portion"** and **"receiving the indicating includes receiving a lane identifier that corresponds with one of a last lane of the**

**first section and a first lane of the second section".** The prior art of record neither anticipates nor renders obvious the above recited combination.

The primary reasons for allowance of **claim 47** in the instant application is the combination with the inclusion in these claims that "**arranging a first portion...wherein the first section includes a first set of contiguous bits**". The prior art of record neither anticipates nor renders obvious the above recited combination.

As allowable subject matter has been indicated, applicant's response must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 C.F.R. § 1.111(b) and § 707.07(a) of the MPEP.
